

KEEP UP THE GOOD WORK, GUYS!

 Many people try to blame male prostitutes for the spread of HIV and AIDS. But studies since 1990 in New York, Atlanta, and San Francisco prove that hustlers know a lot about safe sex.

- Pros averaged 86% on a test about AIDS.
- 9 out of 10 guys use condoms for fucking ass.
- Two thirds always use rubbers for any fucking.
- 3/4 of the pros use condoms with their tricks.
- More than half use condoms for blow jobs.

Hustlers are leaders in the fight against AIDS.

We not only work safe, we often teach clients about condoms and how to use them properly.

SO KEEP WORKING SAFE.

 But you can also get AIDS from having unsafe sex for free.

These studies also show that sometimes some hustlers don't use rubbers with lovers and people we have sex with for free. Like most people, we take more chances with people we like.

REMEMBER TO PLAY SAFE TOO!
